ATHOS & OLYMPUS

WOOD & MULTI-FUEL STOVES

# New Heights of Design

Representing the summit of style and performance, Athos and Olympus stoves bring together the timeless allure of real fire with the very latest in design and precision engineering. Crafted with our history of decades of expertise in solid fuel innovation, this collection of woodburning and multi-fuel stoves encompasses the perfect balance of elegance, power, and long-lasting quality – created to elevate the warmth and character of your home.

As part of the Stovax Heating Group, Onyx is the culmination of over 40 years of experience designing and crafting best-in-class, award-winning products. **Find out more at [onyxfires.com/awards](https://onyxfires.com/awards)**

Shown on cover: Athos 5, shown with ceramic wood-effect beam

# Enduring Style

The Onyx Athos embodies the enduring elegance of classic stove design, with graceful proportions and heritage-inspired detailing. Meanwhile, the Olympus exudes modern sophistication with its contemporary lines and refined presence. Both feature a durable steel body and cast iron door which opens to 180° for easy access, creating a stove that's as beautiful as it is functional.

Four models define this distinguished convector stove range, with both Athos and Olympus available as 5 and 5 Wide models - each constructed to deliver exceptional warmth and timeless style. All Onyx stoves feature an anodised handle with black knurled grip, complemented top and bottom with champagne ends that add a subtle accent of luxury.

## Designed for our Environment

Every Onyx stove is built with our environment in mind. Our advanced Ecodesign technology ensures exceptional heating efficiency while minimising smoke and emissions, and generating the maximum amount of heat from your fuel. Additionally, both Athos and Olympus stoves are suitable for Smoke Control Areas.

## External Air Supply

For added convenience, both the Athos and Olympus can be installed with an optional external air supply, drawing air directly from outside your home.

### Important Safety & Technical Information

A site survey by a qualified solid fuel installer is recommended before purchase, and all Onyx solid fuel stoves must be installed by an approved professional. Fires and stoves require adequate air supply; consult a competent person of solid fuel installations to advise if a fixed air vent is needed to meet Building Regulations. A Carbon Monoxide monitor is legally required. During use, all stove surfaces, particularly the glass panel in the door, become extremely hot and can cause serious injury if touched. Use a fireguard conforming to the latest version of BS 8423 when children, the elderly, or infirm are present.
