Relax - it's a Gazco Fire...

When you choose Gazco, quality and innovative technology are assured. From traditional models to contemporary designs, Gazco is committed to creating the ultimate flame-effect gas and electric fires.

Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances.

Gazco is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all fires in this brochure bearing both the UKCA and CE mark. Similarly, our environmental management systems ensure we work in a sustainable manner, whilst endeavouring to protect the environment by minimising any possible impact from our operations.

Warranty

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty by registering your fire with Gazco. Please note, these warranties exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year non-extendable Warranty, or minimum statutory warranty for your country. Full warranty terms and conditions are available to view at www.gazco.com.

We are proud to have been recognised as an award-winning manufacturer, for our high-quality products and innovative technology. Find out more at gazco.com/awards

Expert Retailer Network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards.

We are equally careful to make certain they are sold and installed correctly so you can enjoy years of pleasure from your fire. Our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

Our experienced retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

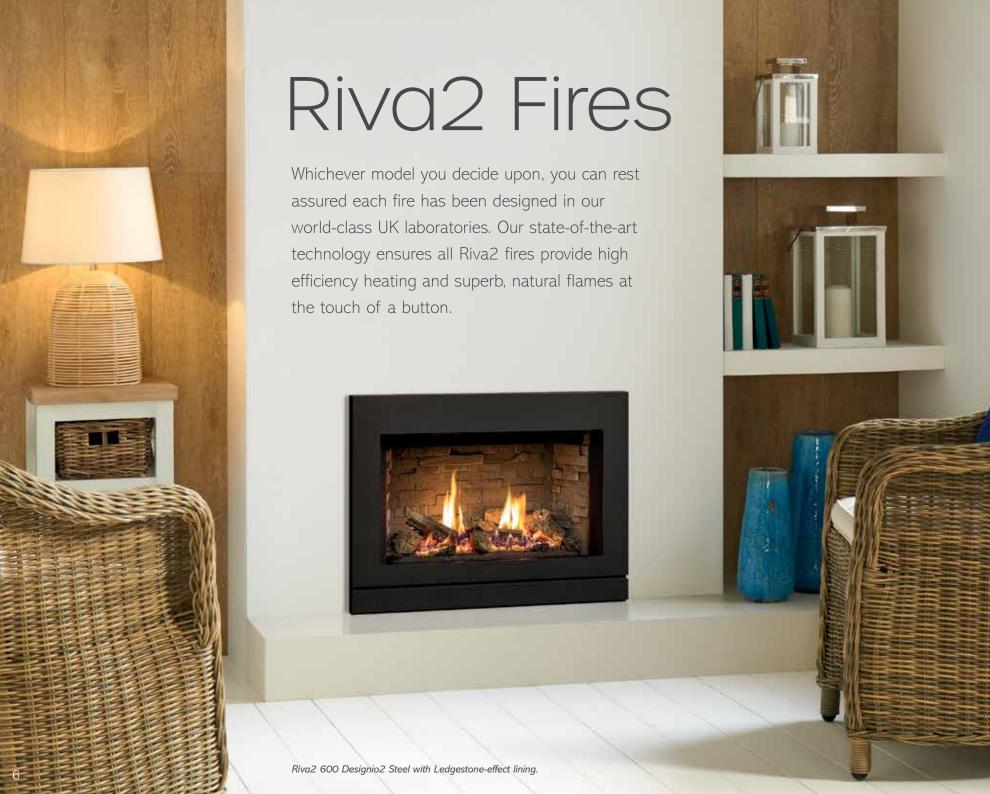

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Find your nearest retailer by visiting: www.gazco.com/retailers

Size Options

400

The most compact fire in the Riva2 range, the conventional flue 400 is perfect for standard sized homes with 16" fireplaces and provides 3.8kW of heat at up to 81% efficiency.

500

Superbly versatile, the Riva2 500 is designed to suit a variety of interiors. This mid-sized fire is available in conventional or balanced flue options and provides up to 4.9kW of high efficiency heat.

500HL Slimline

Designed to be installed in homes without a chimney, the slim depth of the balanced flue Riva2 500HL Slimline allows some of the fire's depth to be housed in a cavity wall. The remaining 75mm depth can be housed in a shallow stud-work faux chimney breast.

600

The Riva2 600 offers magnificent flame visuals and a versatile, landscape form-factor. Bringing impeccable styling to any interior, this fire is suitable for a variety of homes. Opt for a minimalist Edge fire or choose one of the stylish glass or steel frame options for added presence.

600HL

The highly adaptable conventional flue 600HL works equally well in both modern or traditional interiors, thanks to its versatile proportions, which suit standard 22" chimney openings. Whether styled as a contemporary fire or as a magnificent fireplace when coupled with one of Gazco's period stone mantels, you can customise the 600HL to suit your home.

750HL

One of the most impressive fires in the Riva2 family, the 750HL provides up to 7kW of high efficiency heat, making it ideal for heating larger spaces. Designed to fit into a standard 36" chimney opening, the Riva2 750HL allows you to make the most of your existing fireplace, with a balanced flue version for homes without a chimney.

Size (wxh): 797 x 713mm*

Size (wxh): 400 x 388mm*

Size (wxh): 550 x 388mm*

Size (wxh): 549 x 521mm*

Size (wxh): 594 x 370mm*

st Sizes given are those visible upon installation when installed as a frameless Edge fire.

Complete Control

The Riva2 range features a powerful Programmable Thermostatic remote control, which lets you ignite your fire and adjust the flames from the comfort of your armchair. Riva2 fires can also be pre-set to maintain selected temperatures as well as scheduled to turn on at certain times.

Non-reflective Glass

Many fires in the Riva2 range feature crystal-clear, non-reflective glass, providing stunning visuals free from unwanted reflections.

There are a wealth of frame choices available to perfectly complement most Riva2 fires, outlined on these pages and shown in detail throughout the brochure. Each one of these frames offers a unique styling possibility and is crafted from the very finest materials.

Whether your tastes lie with the contemporary or the traditional, you can find a Riva2 frame to suit your interior. Options include a stunning frameless 'hole in the wall' look, sleek glass and steel finishes, and a wealth of hand-crafted stone mantels; ensuring whatever your style preference, there is a Riva2 fire for you.

Selected Riva2 400, 500, 500HL Slimline, 600, 600HL & 750HL are versatile fires that can be installed into both contemporary and more traditional interiors. Gazco's collection of six high quality stone mantels and hearths, with additional slip sets, will complement these fires to ensure a grand finish and a timeless fireplace for your home.

^{*}Requires additional slip sets or back panels. The Riva2 600HL and 750HL slip sets are available from Gazco. Bespoke sourcing will be required for other fires.

Lining Options

Riva2 fires can be styled with a variety of lining options, which each transform the fire's look. Choose from modern or traditional backdrops for your fire's flames, with different linings depending on the model.

	Echoflame Black Glass	Black Reeded*	Ledgestone-effect*	Brick-effect*

^{*}Available with Natural Gas versions. For models with an LPG variant, lining sets can be purchased separately.

EchoFlame Black Glass Lining

All fires in the Riva2 range can be selected with Gazco's inspiring EchoFlame Black Glass lining, which immediately enhances the depth and magic of the fire. Creating a dramatic, three-sided reflection of the dancing flames, this stylish lining creates a visual centrepiece that leaves a lasting impression.

The Riva2 500HL Slimline offers you the superb flames of the Riva2 range with a versatile slim profile which allows it to be installed into a cavity wall. Suitable for a huge range of interiors, the 500HL's shallow depth means that it can be conveniently fitted into an exterior wall with the internal leaf removed,

ensuring a slim footprint and minimising building work. Once recessed into a cavity wall, this Slimline fire protrudes just 75mm into the room.

Traditional Style with a Modern Slant...

Gazco's collection of high quality Limestone mantels and optional hearths offer a unique touch, thanks to the naturally occurring veining, subtle tonal variations, and even occasional small fossils found in the limestone. Each mantel serves as a beautiful and natural complement to many of the highefficiency fires featured in this brochure, making them the perfect choice for creating a grand and timeless fireplace in your home.

STONE HEARTHS

Gazco's selection of beautiful Limestone hearths include either small or large sizes The large size is styled with a stepped edge design whilst the small has a flush finish.

Onyx Luxury Gas Fires

At the Stovax Heating Group, alongside our Gazco collection we also offer a premium stoves and fires brand – Onyx. Explore two beautiful gas fires from Onyx, designed to offer unparalleled style, performance, and visual impact.

Eclipse 60HL Gas Fire

The Eclipse 60HL redefines gas fire innovation with state-of-the-art flame visuals and an ultra-realistic Split Oak log-effect. ImmersiFlame triple burner technology creates captivating flames that wrap around hand-painted logs, delivering a lifelike experience that mirrors a real woodburning fire. The elegant EchoFlame™ Black Glass Lining enhances the flame depth, while non-reflective glass ensures a crystal-clear view. The Eclipse can be hearth mounted, providing versatile installation options for both contemporary and traditional interiors – including within a mantel. Complete with a fully integrated thermostatic remote control, the Eclipse offers effortless management of heat and flame settings.

See it burning at onyxfires.com/eclipse

Avanti Gas Fires

Designed for modern living, the Onyx Avanti range combines sleek design with powerful flame visuals to create a stunning centrepiece. Available in two sizes, the Avanti 65 and 85, these fires feature an advanced burner system, creating a glowing ember bed and wrap-around rolling flames – all augmented by a strikingly realistic Split Oak log-effect for a woodburning appearance. Our signature EchoFlame™ Black Glass Lining enhances the flame visuals, while premium non-reflective glass ensures your fire is the focus of the room. Choose between the bold Expression frame or the minimalist Edge+ for the perfect finishing touch. A frameless Edge installation is also possible, but no matter your styling choice, the Avanti gas bring style and performance in equal measure.

Further information about these exciting ranges can found in separate, dedicated brochures, which can be requested from your local retailer or viewed online at www.onyxfires.com

Have you considered electric?

In addition to the wide selection of gas fires shown in this brochure, the Stovax Heating Group is pleased to offer a vast portfolio of electric models with superb flame visuals and breath-taking realism that can be controlled from the comfort of your favourite chair.

Offered in a wealth of styling options, these fires feature the very latest technology with realistic flames for a versatile and stunning focal point in any home – all without the need for a chimney!

From our luxury Onyx Avanti electric fire collection, to the versatility of the Gazco eStudio or eReflex ranges, each model can be enjoyed with or without the heat for year-round ambience.

Available in frameless inset options, options to suit matching classic stone mantels, or multi-sided versions, there is a design to suit every home.

For more information, visit gazco.com/electric, or speak to your local retailer.

Your Home and Flue Requirements...

Conventional Flue

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney, or as a pre-fabricated chimney system. Should your home have neither at present, it is usually possible to have a pre-fabricated system installed in your home if required.

Brick/Stone Chimney (Class 1)

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-fabricated Flues

(Class 1 & 2)

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Balanced Flue

Balanced flues work in conjunction with Gazco's Glass Fronted gas fires. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

Balanced Flue (No chimney required)

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the fire selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components. Please refer to our dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at www.gazco.com.

No Air Vent Required (UK)

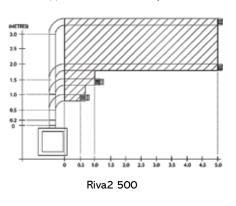

All fires shown with this symbol have the advantage of not normally requiring an air vent*. Please discuss this in full with your local retailer.

*Requirements in the Republic of Ireland are different.

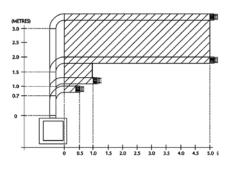

Balanced Flue Options

Gazco offers a comprehensive range of balanced flue system components. Please refer to our dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at www.gazco.com.

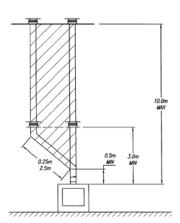

Vertical from the top of the appliance then horizontally out

Riva2 750HL Nat Gas

Vertical from the top of the appliance

^{*} ODS (Oxygen Depletion Sensor) - This Conventional Flue safety feature will shut off the gas supply to the burner in the event of a reduction to oxygen levels in the room.

[#] Efficiency figures given are based upon the maximum achieved in the options available for each model, for further technical information, please see page 52 onwards.

^{**} For LPG models, lining set can be purchased separately.

Your retailer will be able to advise on your specific requirements.

How little does it cost to run a Gazco Riva2 gas fire?

Choosing a Gazco high-efficiency gas fire is not only about enjoying stunning flame visuals - it can also be a smart choice for reducing your energy consumption. With high efficiency performance, our Riva2 gas fires can be part of a zonal heating strategy - heating the room you intend to use, rather than the whole house, potentially helping you lower your heating costs while keeping your home cosy. For example, a Riva2 400 gas fire could cost little as 65p for warming your living space during an evening*.

Find out more about running costs and saving energy at www.gazco.com/howlittle

Riva2 400 Gas

- ✓ Input: 5.2kW (high), 2.6kW (low)
- ✓ Nominal Output: 3.8kW
- ✓ Maximum Efficiency: 81%
 †
- Efficiency label: C

Cost per evening*

Example Running Costs							
1 Hour	on low continuous heating	16p					
1 Hour	on high continuous heating	32p					
4 Hours	on low continuous heating	65p					
4 Hours	on high continuous heating	£1.30					

*Based on running the Riva2 400 Conventional Flue Natural Gas model at 4 hours on low input of 2.6kW. The costs presented are based on the average UK cost per unit of gas (including VAT) from 1 October 2024, for customers on the default tariff. Figures generated are for typical domestic consumption paying by direct debit and will vary based on actual household usage (6.24p per kWh, OFGEM, Energy Price Cap, https://www.ofgem.gov.uk/energy-price-cap). Does not include any costs relating to product maintenance and servicing. Prices rounded to nearest whole pence. To the best of our knowledge all content is accurate at the time of going to print (September 2024). E&OE. †Maximum efficiency is achieved when running product on high output setting.

Important Information

Technical Specifications

All specifications given in this brochure are approximate. Actual specifications for each individual product will vary according to model. Your Gazco retailer will be pleased to provide any further information you require. Alternatively you may view or download specification sheets from **www.gazco.com**

Installation and Safety

Gazco gas fires must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or RGII registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by viewing or downloading them from **www.gazco.com**. Please note that all parts of these fires, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423 (latest edition) is used in the presence of young children, the elderly or infirm.

Colours/Flame pictures

Owing to variations in studio lighting and printing inks, the finishes/colours of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples. Whilst all the flame pictures shown in this brochure are of actual fires, flame pictures may vary depending on the installation, flue conditions and geographical/surrounding features that may effect the efficiency of the flue.

Care and maintenance

Traditional materials, such as polished steel and brass, tarnish on contact with air, especially when also exposed to heat. To help minimise this effect, we recommend fires receive regular treatment with suitable proprietory cleaners. Additionally, please remember that gas fires will require servicing annually by a qualified gas installer Gas Safe registered in the United Kingdom or Bord Gáis registered in the Republic of Ireland).

Warranty and Product Improvement

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty provided your fire has been registered with Gazco. The second and subsequent years are dependant on the appliance being serviced 12 months after installation and annually thereafter and exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year Non-Extendable Warranty, or minimum statutory warranty for your country. Full warranty terms and conditions are available to view at www.gazco.com.

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

Air Ventilation for Gas Fires

To comply with gas appliance installation regulations, the Riva2 750HL conventional flue requires additional ventilation into your room. For further information, please consult either your Gazco retailer or the Gazco Technical Information on our website **www.gazco.com** to confirm the ventilation required. All other fires featured in this brochure do not require additional ventilation.
