How to re-rope your door seal video

A thermal rope is used to provide a heat resistant air tight seal on the appliance doors and also is often used to provide a seal for the stove or fire glass, essential to ensure your appliance works as intended and with optimum efficiency. Stovax have created a useful step by step video to help lead you through the simple maintenance task of re-opening a door seal, simply visit **www.stovax.tv/ropeseal**.

Top **Tip**

To allow your rope adhesive time to properly cure, leave it a minimum of 12 hours before burning your appliance.
