## Characteristics

### Shock resistant

BQS quartz composite has a high shock resistance. This premium quality material is composed of quartz sand and powder, (epoxy) resins and colour additives, which provide your worktop with the durability it requires.

### Stain resistant

BQS quartz slabs are extremely dense, which will greatly reduce the chances of any liquid (water or oil) from seeping in and causing damage. As a result, cleaning is easy and you will continue to enjoy a beautiful surface without having to put much work into maintaining it.

### Scratch resistant

BQS quartz slabs are very hard and are therefore scratch resistant. This means that you will be able to use your standard household objects and kitchenware without a care. However, we do recommend the use of cutting boards for chopping and cutting.

### 10-year warranty

Professionals will benefit from a 10-year warranty on BQS quartz surfaces. In the unlikely event of a problem, the Brachot Surfaces team will always help you find a solution. Please read the warranty terms and conditions carefully on our website: [www.brachotsurfaces.com](http://www.brachotsurfaces.com).

## Use, cleaning and maintenance

### First cleaning

When first cleaning the worktop after installation, we recommend using a product such as Lithofin MN Power Clean. This ensures that all dirt and product residues are removed, so you can start using your worktop in clean condition.

### Daily maintenance

Regular cleaning is important to maintain the enduring quality of your worktop. We recommend cleaning your worktop with a damp cloth and a mild detergent, such as Lithofin MN Easy Clean. Whatever the stain may be, it is always best to wipe it up as soon as possible.

### Water stains

Excess water can cause calcification in time. In order to avoid this, you should wipe it away immediately. If you notice scale deposits, we recommend the use of a product such as Lithofin KF Ceramic Clean.

### How to prevent damage

Some products are liable to cause damage to the surface's polished finish or cause dull spots. You should therefore avoid using products such as abrasives, ammonia, scouring pads, steel wool and thinners.

In addition, you should avoid placing hot pans or appliances directly on to the worktop and make use of trivets or a heat resistant board. Please be careful while using sharp objects (such as knives), we strongly advise the use of chopping boards when you are.

For more information regarding maintenance, use and installation, visit our website [www.brachotsurfaces.com](http://www.brachotsurfaces.com)

### Not sure about the right product?

Maintenance of your BQS quartz composite is easy. However, if you're not sure about using the right cleaning product, or if you have a specific question about the maintenance of quartz composite, do not hesitate to ask for advice at +44 1384 56 43 15 or [info@brachotsurfaces.com](mailto:info@brachotsurfaces.com).

## Technical Data Sheet

### Product specifications

#### Slab dimensions

nominal thickness	2 cm, 3 cm
nominal slab size	320 x 160 cm

#### Nominal weight

2 cm	250 kg per slab
3 cm	375 kg per slab

### Typical physical properties

Property	Method	Result
apparent density	EN 14617-1	2480 kg/m <sup>3</sup>
water absorption	EN 14617-1	0.03%
chemical resistance	EN 14617-10	class 4
fire resistance		FI
flexural strength	EN 14617-2	38,3 MPa
abrasion resistance	EN 14617-4	26,8 mm
compressive strength	EN 14617-15	164 MPa

Brachot Surfaces produces high-quality slabs of natural stone and blended materials, which are commercialised through the brands BQS (quartz composite), Unistone (quartz composite), Unimarble (marble composite), Uniceramica (ceramics) and Terrazzo (cementitious sheet material). Combining technical innovation with many years of expertise, this Brachot Family Member offers complete materials for interior and exterior finishing. Thanks to its ample knowledge and experience, Brachot Surfaces is also the ideal partner for selecting and purchasing blocks of natural stone.

**Brachot Surfaces is a Brachot Family Member.**
