# **THE POWER AND AESTHETICS OF QUARTZ COMPOSITE**

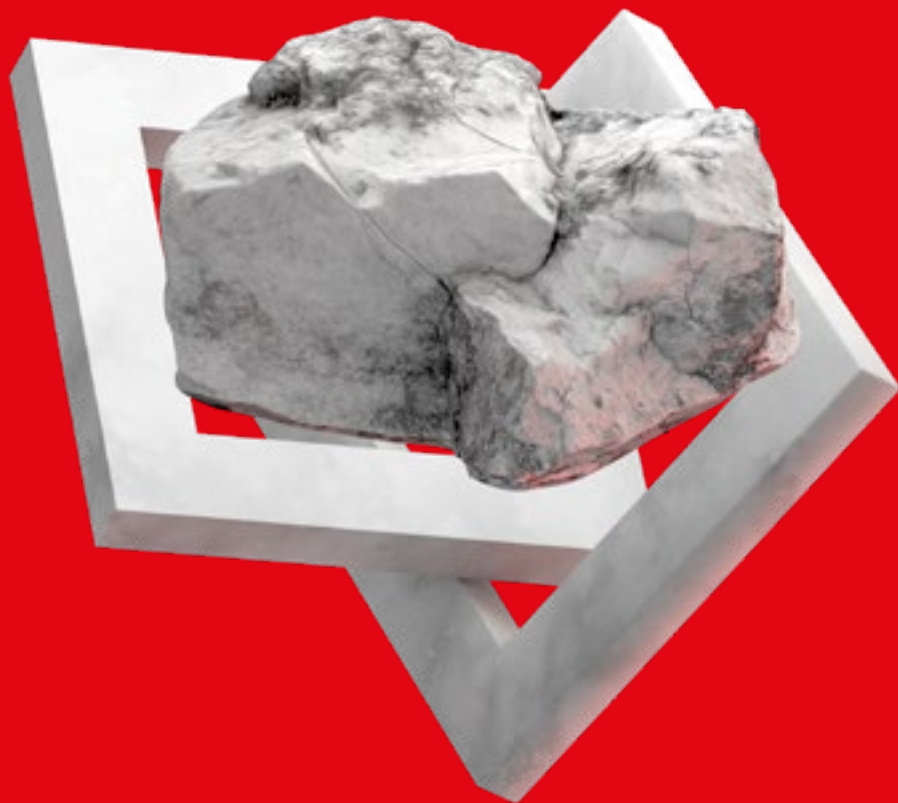

**unistone**

**unistone**

Unique expertise, unified in high-quality blended materials

- ♦ Top quality quartz composite (> 90% natural quartz)
- ♦ Easy maintenance: acid, scratch, and stain-resistant
- ♦ Low water absorption
- ♦ Breton technology
- ♦ Food-safe & certified antibacterial
- ♦ Both plain and veined design
- ♦ Unique patterns throughout the thickness of the slab

**Unistone quartz composite slab material effortlessly combines aesthetics with durability. This material not only looks beautiful but is also exceptionally hard.**

It consists of over 90% natural quartz: the high-quality result of the tried and tested Breton Technology, where natural quartz grains are mixed with polymers. The result is an unprecedented combination of strong technical properties.

Brachot has developed the designs based on a profound knowledge of natural stone, thanks to over 125 years of experience in the sector. The slab material features the natural looks of marble, travertine, granite, limestone, and basalt. The natural designs capture the essence of natural stone in design, appearance, and feel. The contemporary range perfectly aligns with today's housing trends.

# Choose the design that suits you

Whatever your plans are, there's always a Unistone design that fits in perfectly with them. Unistone is available in over 50 colours, from snow white to pitch black – and everything in between. The extensive palette focuses on natural nuances with visible or camouflaged structures. You can choose between numerous patterns, from a marble look to the look of granite, limestone, concrete, and much more.

Unistone slabs are generally available in two sizes: the standard size of 300 x 140 cm, and a jumbo size of 330 x 165 cm. The advantage of the jumbo format is that a complete, final product, such as a kitchen worktop, can be produced immediately, with hardly any or no seams at all.

In addition, various Unistone slabs are offered in three thicknesses, from 1.2 cm to 2 cm and 3 cm. This material therefore lends itself to numerous specific indoor applications in different types of settings.

The designs are divided into four collections:

-  Essentials Collection
-  Earth Collection
-  Private Collection
-  Artist Collection

Nero Marquina - Artist Collection

Photography: Steve De Bruycker - Showroom: Keukens de Abdij, Aartselaar (BE)

## A variety of interior applications

Each material has its own specific properties. For more information, please view the technical data sheet at [www.brachot.com](http://www.brachot.com).

# A selection of our finishes

Three finishes are available, ensuring that you can find the finish best suited to your taste and the style of your home or project.

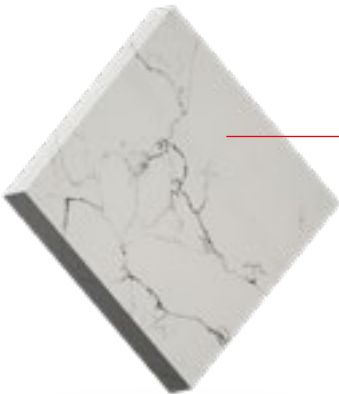

## Polished

Without a doubt, the glossiest and smoothest finish, highlighting the colours, patterns, and white dots. Dark shades create a mirror effect.

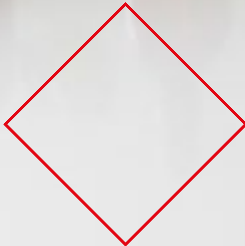

## Honed

The surface is scoured until a warm, matt shine is obtained. The grain size during scouring determines the final result.

## Velluto

Innovative finishing method developed in-house at Brachot. A velvet, matt finish with warm colours that is very maintenance-friendly.

**Unistone® Bianco Assoluto**  
Essentials Collection

Unistone® Traonyx - Artist Collection

## Opting for durable quality

Add Unistone's hardness and low water absorption, and you immediately know you're dealing with a particularly maintenance-friendly material. Unistone is highly resistant to scratches, stains, many chemicals, and much more. These durable and high-quality slabs have everything needed to last for many generations.

We are happy to advise you on their specific maintenance, from initial cleaning to regular cleaning. For example, the polished Unistone surfaces usually do not require any additional protection, while the Velluto surfaces require specific impregnating agents.

# CRAFTING VALUE FOR FUTURE GENERATIONS

**[www.brachot.com](http://www.brachot.com)**

Brachot extracts, produces and distributes landscape and surface materials in natural stone and blended materials. With its 20 quarries, 7 production sites and 13 distribution centres across Europe and Africa, Brachot has the entire production process in its own hands: from extraction to sawing and processing to distribution. This creates endless possibilities for the production of blocks, slabs, tiles and accessories for indoor and outdoor applications in natural stone and blended materials.

Brachot and its Family Members are firmly united by their focus on innovation. They continuously come up with new possibilities and applications, both in production and distribution. State-of-the-art machines and techniques enable Brachot to work faster and to ensure higher quality and greater sustainability. As a result, Brachot has become an internationally leading name in the world of natural stone and blended materials.
